IMPROVING HPC PERFORMANCE

sponsored by

Association for Bridge Construction and Design (Eastern New York Chapter)

And

Precast Concrete Association of New York

April 28, 2004 Albany, NY

8 am to 12 pm

Hilton Garden Inn @ Northway airport exit

Registration 7:30

With High Performance Concrete now a more common construction reality, some problems with design and specification, placement, finishing, curing, cracking, handling, jobsite logistics, crew training, inspection, and so forth have arisen. To better understand HPC, gain its many advantages, and use it successfully, the participants in this seminar will all share their experiences and some recommendations. Working together, we can learn to *avoid* many unexpected problems and costs, while reaping the benefits and advantages of HPC.

Our presenters, who are all involved with HPC, represent a broad range of experience:

Introduction – understanding the two different types of HPC mixture designs

Owner Impact – life cycle costing, bridge spans/girder spacing,

Lou Triandafilou, P.E., Federal Highway Administration

Materials Impact – choices, material considerations, QC/QA, Constructability.....

Don Streeter, P.E., New York State Materials Division

Designer Impact – what has been learned so far....

Mark Laistner, P.E., Erdman & Anthony

Contractor Impact – placement, finishing, curing, mix adjustments and workability

Steve Avveduti, P.E., Harrison & Burrowes

Andy Clemente P.E., Bonded Concrete

Precaster Impact – on plant casting, shipping, and suggested improvements...

Ira Adler, The Fort Miller Company
