

CIP One Day Bridge Course

**15% of U.S. bridges are
structurally deficient.
Keep yours from falling down.**

CIP One Day Bridge Course

The NACE International Coating Inspector Program (CIP) is the largest and most recognized coating inspector certification and training in the world. The CIP One Day Bridge Course focuses on coating application of bridges and the role of the bridge coating inspector in the quality control process.

Who Should Attend?

- CIP Level 1 certified coating inspectors
- Quality assurance and control inspectors and contractors
- DOT bridge engineers
- Asset maintenance managers
- Coatings contractors
- Inspection company employees
- Surface preparers
- Applicators

Why Attend?

- You're qualified to work on a bridge project when you complete the course – training meets the requirements specified by DOTs
- Expand your career to perform work on aging bridges and highways, a field in need of corrosion mitigation
- Enhance your CIP certification by learning necessary bridge inspection skills in just one day

Visit www.nace.org/education for more information and class availability.

Course Highlights:

- Nomenclature specific to bridge components
- Environmental health and safety
- Surface preparation
- Coatings specific to bridges
- Sample specification

Recognition:

- Participants who successfully complete this course receive a bridge stamp on their CIP card

Duration of Course:

- 1 day

Prerequisites:

- Successful completion of CIP Level 1

CEUs:

- 0.8
